Subject: Opa approved statement on gen x

Here's what was approved and sent to media . John- you might want to save this in your files .

Holding statement:

“EPA is working to gather more information on this matter and will review and determine next steps.”

Background info:

In 2009, EPA and DuPont entered into a consent order that required DuPont to recover, capture or recycle GenX from air emissions and water discharges at the company's facilities in the United States at a rate of 99 percent. In its review of the GenX premanufacture submission, or approval to make the chemical, EPA determined that GenX could go to market if the conditions of the consent order were met.
